

White Paper
Pimped Out Penguin Project 2025
Solana Launch

Introduction

\$POP is more than just a meme coin — it's a movement powered by the Solana network. With lightning-fast transactions, near-zero fees, and a growing ecosystem, Solana is the perfect home for a token that puts community and culture first.

At the heart of \$POP is a simple mission: build trust through transparency, create a fun and recognizable character, and reward a growing community through smart tokenomics, competitions, and ongoing airdrops.

Vision & Values

Transparency: Everything from the token contract to dev wallets will be visible and verifiable.

Community-first: We are building from the ground up with the help of our early supporters.

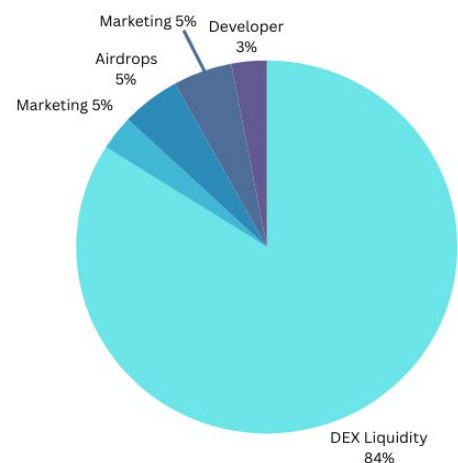

Character-led branding: \$POP isn't just a token. It's a penguin with a personality, a movement with a mascot, and a brand you can trust.

Security & Trust Measures

We believe trust should be earned from day one. Here's how we're ensuring \$POP is safe and fair:

- **No Mint Function:** Supply is fixed forever at 1 billion tokens.
- **Liquidity Locked:** Our DEX liquidity will be locked to prevent rug pulls.
- **Ownership Renounced:** The contract will be renounced for long-term security.
- **Audit:** The smart contract will be audited before launch (recommendations: Coinsult, BlockSAFU, or Dessert Finance).
- **Wallet Transparency:** All dev and marketing wallets will be published publicly prior to launch.
